An aerial photograph of a city at night, showing a dense grid of buildings and streets. A large, illuminated roundabout is the central focus, with traffic moving in a circular pattern. The city lights create a warm, glowing atmosphere against the dark sky.

Model forget
everything

That's why we need memory

They forgot everything...

User: My name is Thang.

LLM: I've got your information. From now, I will call you Thang.

User: What is my name?.

LLM: I don't know. Please tell me your name.

Chatbot ~~WITHOUT~~ conversational memory

NO CHAT HISTORY SAVED

Do you know my name?

I'm an assistant and I don't have the ability to know your name without being told.

Chatbot ~~WITH~~ conversational memory

Hello, my name is Jean

Hello **Jean**, nice to meet you.
How can I assist you today?

What is the capital of France?

The capital city of France is Paris.

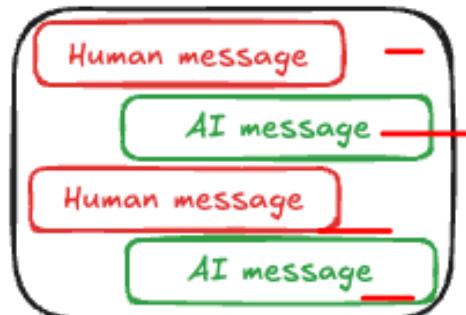

Do you know my name?

Yes, I do. Your name is **Jean**.
How can I help you today, **Jean**?

The memory fabric for enterprise AI

Memori plugs into the software and infrastructure you already use. It is LLM, datastore and framework agnostic and seamlessly integrates into the architecture you've already designed.
